No. 210. APRIL 1920.

## WITH HIGHER WAGES AND SHORTER WORKING HOURS

than ever before, the adoption of labor saving machinery becomes more and more important. In the field of weaving the Northrop Loom meets the requirements of practically all classes of cotton goods that can be woven with one shuttle. It is also used in weaving light worsteds, linen, and certain silk fabrics.

Our Northrop Loom orders include mills making the following fabrics:

BROAD AND NARROW PRINT CLOTHS
CAMBRICS
OSNABURGS
WIDE SHEETINGS

LAWNS

# BOBBIN-STRIPPING MACHINE PATENTS

We hereby give notice to the trade that we have licensed the Brown-St. Onge Company of Providence, Rhode Island, and Union, S. C., under Makepeace Patent, No. 671,976, dated June 7, 1904, and owned by our Company, to make and sell bobbin-stripping machines of the so-called "Kleanol" type, as heretofore put out by the Licensee, and similar machines containing the Makepeace invention.

We have heretofore given notice to the trade in the COTTON CHATS of March 1915, January 1916 and June 1918, that under this same Makepeace Patent we have granted licenses to put out bobbin-stripping machines to the Lyon Manufacturing Company, of Fitchburg, Massachusetts; the General Supply Company, of Danielson, Connecticut; the Terrell Machine Company, of Charlotte, North Carolina, and Crompton & Knowles Loom Works, of Worcester, Massachusetts. We have stated further details as to these licenses in said previous notices.

We also licensed the Terrell Machine Company under Burnett Patent, No. 1,260,867, dated March 26, 1918, and owned by our Company, to put out bobbin-stripping machines of the so-called "Ideal" and "Utsman" types.

So far as we know, these important patents are generally respected, and we repeat our warning that, as owners of said patents, and in justice to our Licensees, we shall enforce our full legal rights against any persons who make, sell or use infringing and unlicensed machines.
